

In this day and age it is sometimes nice to have your number not show up. You just never know who is going to get it and as well it keeps you private. This article will show you a simple tip on how to keep your cell phone number private.

Step 1 The first thing you will want to do is grab your cell phone. Step 2 Next dial you will want to dial 611 from your phone. Step

Step 3
This will get you directly to customer service directory. You might have to go through options to get to someone. A possible tip is to hit 0 to get right to a customer service rep.

Step 4
From here you will just explain to them you want to have your number blocked.

Step 5
You are now set up and your number will be blocked.

Step 6
If for instance you do want your number to come up on a one time scenario you will have to dial *82 before the number you dial. For an example it would be *82 (111) 111-1111. This will allow your number to be visible.
