

If my mobile's internet connection is cut while in the process of sending a transaction, what will happen?

In such a case there exists a possibility of the market order not being fulfilled. Please check the status of the order under the "position" function on your display. All the outstanding orders will be displayed under the "position" as such. If there is no indication of an outstanding order, this means that the order is settled. If, on the other hand, the position shows an outstanding order, then the order was not settled.
